

Telcon International Limited
Speciality Magnetic Components

REACH Compliance Statement

Telcon International Limited is fully aware and understands the aspects and impacts of the EU regulation 1907/2006, dated December 2006, on the Registration and Authorisation of Chemicals and the dates which the guidelines dictate.

Telcon International Limited is classified as a Downstream user. We do not create chemicals from raw materials but are involved in the processing of them. We are not therefore required to pre-register or register our products.

We confirm that none of the 201 substances on the European Chemicals Agency list of SVHC, last updated July 2019, are used in any of Telcon International Limited's products or production processes.

Our current active REACH policy is therefore:-

1. To continue to monitor & stay up to date with the legislation as it further develops.
2. To continue to monitor the Candidate List as it continually evolves.
3. To continue to work with our suppliers to ensure all materials are compliant.
4. To continually review our materials in both existing and all new products.

Should you require further information, please contact us.

S. W. Swaine
